framed detail

The **Clearview Display** is our new, exclusive way of presenting the properties in your window. Self aligning magnetic holders ("magbacks") accurately snap into place to give you easy access for property updating. Sleek & non intrusive to your office, this display can be instantly used double sided. Huge range of border colours available.

Available in four formats: **Floor to Ceiling** - the modules can be hung on stainless steel cables by means of prestige fittings. **Framed** - the modules are supported by a sleek 35mm oval faced aluminium extrusion in your choice of annodised colours.

Direct to Glass - the magnetic cardholders are installed to the inside of your window.

Raised off Wall - the module is pinned off the surface on prestige stainless steel supports.
