slim dimensions increase office space

internal view

maximise display area

The **Slimline Display** is our modern, bright way of presenting your properties. Acrylic sleeve cardholders attach to vertical stainless steel wires by means of prestige adjustable fittings. This display can be installed directly onto the window frame for the minimum impact on the internal space in your reception area, or set back to allow optional Low Volt Downlights to illuminate the cardholders. Slim & clear with no frame, this maximises the light into your office, and is instantly double sided. Optional top & bottom tracks for adjustable width wires.
